

## TR-Plus

The TR-Plus radio remote control system is designed for domestic or light industrial applications. The system consists of a hand-held remote control and receiver; simply apply power, connect load to relay output and the system is ready to operate

Applications include electric gates, shutters, driveway lights, timed devices, sound systems, irrigation systems, disability access, CCTV Camera switching & light lifting equipment.

### Technical Specification:

- Up to 6 buttons
- Equipped with a LED indicator
- 433 MHz radio frequency
- 66 bit KEELOQ rolling code
- Operating range: upto 100m approx
- Protection rating: IP54
- Battery: 3V CR2032
- Operating & Storage temperature: -10°C to +40°C
- Dimensions: 120 x 66 x 12mm

### Radio Receiver

- Power supply: 2V/24V
- Transmission frequency: 433.92MHz
- Compatible codes: HCS customised rolling code  
HCS rolling code 'fixed' code & DIP switch
- Type of connection: Terminal board
- Switch capacity: 0.5A/30V
- Storable remote controls: 1000
- Operating temperature: -20°C to +50°C
